

CEO Lifestyle Management

Version 2.0 Update Report

Release Type: Major System Upgrade

Status: Development Complete / Testing Phase

Purpose: Transform CEO Lifestyle Management from a functional management application into a more secure, intelligent, and scalable business operations platform.

Version 2.0 Overview

Version 2 introduces major improvements across:

- Security
- Administration
- Dashboard intelligence
- Client relationship management
- Inventory management
- Business calculators
- Data protection
- User experience
- System flexibility

The focus of V2 was not only adding features, but improving how the entire ecosystem connects and operates.

1. Security & User Access Management

Added:

Authentication System

Implemented a dedicated application access screen.

Features:

- Username and password login.
- Protected access before viewing business data.
- Apple-inspired authentication interface.
- Universe background customization.
- Separate authentication screen background upload.

User Management

Added administrative controls for managing application users.

Features:

- Add users.
- Remove users.
- Deactivate users.
- Update usernames.
- Update passwords.
- Manage user access.

2. Centralized System Settings

Created a centralized control area for managing application configuration.

Added management options for:

- Shipping costs.
- Default exchange rates.
- Markup percentages.
- Inventory thresholds.
- Reminder windows.
- Branding preferences.
- Background images.

Purpose:

Allow system adjustments without modifying application code.

3. Master Administrator Guide System

Added the foundation for an internal application walkthrough guide.

Purpose:

Create a living operational manual controlled by the Master Administrator.

Features:

- Module explanations.
- Navigation instructions.
- Feature descriptions.
- Future version documentation.
- Controlled updates only when instructed by Master Administrator.

The guide will not automatically update after every change.

4. Dashboard Improvements

Interactive Dashboard Carousel

Introduced a new interactive navigation system.

Purpose:

Reduce excessive scrolling while keeping all modules accessible.

Carousel modules include:

- Librarium Luxe Inventory.
- Librarium Book Cost Calculator.
- Location Cost Calculator.
- Interactive Agenda.

Features:

- Left/right navigation.
- Dot indicators.
- Apple-inspired transitions.
- Future quick module selection support.

Dashboard Information Improvements

Added and improved:

- Upcoming Agenda.
- Next 30 Days Milestones.
- Clients Needing Attention Today.
- Better milestone summaries.
- Improved event descriptions.

5. Client Relationship Improvements

Milestone Intelligence

Improved milestone descriptions across the application.

Before:

- Carli
- Wife Birthday

After:

- Carli's Wife's Birthday (Nickellia)

Updates applied to:

- Milestone Calendar.
- Interactive Agenda.
- Dashboard reminders.
- Watchtower.

Calendar Improvements

Updated calendar legends:

Gold Client Events

Color:

 Gold/Yellow

Platinum Client Events

Color:

 Black

CEO Events

Color:

 Blue

Removed:

- Reference Day

6. Librarium Luxe Inventory Upgrade

Inventory Management Improvements

Added:

- Active/Inactive inventory status.
- Book deactivation functionality.
- Inventory validation.
- Stock monitoring.

Inventory Summary Enhancements

Added:

- Master Inventory Summary.
- Inventory Validation Report.
- Out of Stock alerts.

- Low Stock alerts.
- Need Restock alerts.
- Allocation Status.

Inventory Carousel

Converted inventory sections into interactive navigation.

Features:

- Left/right navigation.
- Dot indicators.
- Cleaner viewing experience.

7. Excel Management Improvements

Improved Excel workflows.

Added support for:

- Active/Inactive status.
- Better inventory control.
- Book pricing management.

Protected:

- Location allocation.
- Inventory ownership.

Excel uploads should no longer overwrite controlled application data.

8. Business Calculator Suite

Created professional calculation tools.

Librarium Book Cost Calculator

Features:

- Manual book cost input.
- Exchange rate input.
- Quantity selection.
- Editable shipping cost.
- Automatic markup calculation.
- Rounded pricing.
- Customer copy message generation.

Location Cost Calculator

Features:

- Distance input.
- Cost per kilometer.
- Editable toll fees.
- One-way option.
- Round-trip option.
- Automatic quotation generation.

Apparel Studio Quote Calculator

Added garment quotation system.

Supported garments:

- T-Shirts.
- Polo Shirts.
- Oxford Shirts Short Sleeve.
- Oxford Shirts Long Sleeve.
- Sweatshirts.
- Pullovers.

Features:

- Garment dropdown.
- Adult quantity.
- Plus-size quantity.
- Kids quantity.
- Editable garment pricing.
- Additional charges.
- Design fees.
- Customer-ready quote generation.
- Copy quote button.

9. Book Management Improvements

Added:

Selling Price Column

Book selling price now appears across book-related areas.

Included in:

- Inventory.
- Reports.

- Excel files.
- Book workflows.

10. Data Protection & Reliability

Added requirements for:

Data Validation

Protection against:

- Negative inventory.
- Invalid dates.
- Duplicate clients.
- Duplicate books.

Backup & Restore

Master Administrator controls:

- Full application backup.
- Import previous backup.
- Restore previous version.

Backup includes:

- Client data.
- Inventory.
- Milestones.
- Sales records.
- User accounts.
- Settings.
- Branding preferences.

11. User Experience Improvements

Updated:

- Larger calendar indicators.
- Larger text visibility.
- Full-screen layout improvements.
- Better spacing.
- Improved summaries.
- Cleaner navigation.
